

Form 3 — Variables & expressions

Teacher inspection pack · disk duration-kolibri-form3-001 · idea04 :18080

Inspection sheet for Koen and teachers. Titles and IDs are the locked pins already in App#10. This is not a new topic and not new teaching text. Science and every other Khan topic stay out of this set.

Pack

Lesson title	Form 3 Duration Lesson
Lesson id	b01a1b42-d000-0fad-3eb0-0d1688046413
Class	Form 3 · 731fc657-e908-20bb-e9e1-c3305d742e25
Facility	Duration Tests Facility · 11924884-1442-e963-7d08-6f54dd4a3c9b
Topic	Variables & expressions
Topic path	Math > Pre-algebra > Variables & expressions
Topic nodeId	0f21619f-bd75-505f-92bd-96184b07b46d
Topic contentId	2bcfaf16-33fc-5573-92c0-c330475b49a0
Channel	Khan Academy (English - US curriculum) · c9d7f950-ab6b-5a11-99e3-d6c10d7f0103 (public, no Studio token)
diskId / instanceId	duration-kolibri-form3-001 / kolibri-form3-001
Container / data	idea168-kolibri-form3 · /home/pi/idea168-kolibri-form3
Image	koenswings/kolibri:1.0-0.15.5-dev
Sign-in	teacher / password hint teacher · learners learner01–learner03
Intent pins	open_video video-form3-01 · open_exercise exercise-form3-01
Source pins	fixtures/kolibri-form3/content/CONTENT.live.json

How a teacher opens it

- Base URL (idea04): <http://100.108.39.45:18080/>
- Coach classes (fixture URL): <http://100.108.39.45:18080/coach/#/classes> — class **Form 3**, lesson **Form 3 Duration Lesson**.
- The named lesson assigns only `video-form3-01` and `exercise-form3-01`. The other four leaves are on the topic and were imported; they are not lesson resources.
- Learn content (existing walker URL shape): <http://100.108.39.45:18080/learn/#/topics/c/<nodeId without dashes>>
- Lesson route (existing walker URL shape): <http://100.108.39.45:18080/learn/#/lessons/b01a1b42-d000-0fad-3eb0-0d1688046413>
- Learner home (fixture URL): <http://100.108.39.45:18080/learn/#/topics as learner01>.

Live check 2026-10-04 13:43 CEST (read-only, no claim, no restart). idea04 (100.108.39.45) answered ping. TCP connect to the pack port was refused, so the sidecar is not accepting HTTP right now. Pins below are from the 2026-10-01 import (6/6 leaves available then). This check did not start or stop anything.

Videos (3)

#	Kind	Title	logicalId	contentId	nodeId	On the named lesson?
1	video	What is a variable?	video-form3-01	0a2fdaad-532c-56b2-b90f-62f9204e3be8	b3677df2-bf9e-5e5f-	yes — assigned on the named lesson

					a1f1-9e57a2f26b97	
2	video	Terms, factors, & coefficients	video-form3-02	30fb3fbd-9d4a-549f-8643-f610a165df5a	fcba0a76-d607-5c02-b1f9-f7742847a4c4	no — topic leaf only (not a lesson resource)
3	video	Why aren't we using the multiplication sign?	video-form3-03	3ddc455a-eaab-51c0-8e8b-9484bf9a1830	7f1b5480-4b2e-5d81-b767-0d383cf341a8	no — topic leaf only (not a lesson resource)

Exercises (3)

#	Kind	Title	logicalId	contentId	nodeId	On the named lesson?
1	exercise	Parts of algebraic expressions	exercise-form3-01	ed0c23b8-e517-5687-90ae-1bda74ab22ba	a484d292-1dd3-5f42-8d08-7b61a8e82416	yes — assigned on the named lesson
2	exercise	Evaluating expressions with one variable	exercise-form3-02	0c49599e-0131-5fdb-957a-5bbbbbdf58c5e	d455f572-cc33-55b0-8c98-2a997d412aa8	no — topic leaf only (not a lesson resource)
3	exercise	Variable expressions with exponents	exercise-form3-03	7110cacb-b8d6-58b0-b799-a3d0418e40a9	8c880694-0794-5913-918b-90523c2ac8ca	no — topic leaf only (not a lesson resource)

What this sheet covers vs lesson chrome

Covers: the content pack a teacher can run once the sidecar is listening — lesson title, the six leaf titles, contentIds, nodeIds, and the existing Learn/Coach URLs.

Does **not** cover lesson-chrome Intents. These stay deferred until a Kolibri image exposes `data-testids`. Stock image `koenswings/kolibri:1.0-0.15.5-dev` does not. Preferred future names are in `tests/duration-tests/LESSON_CHROME.md` and are not in this image:

- `keep_watching`
- `next_resource`
- `exit_lesson`
- `finish_exercise`
- `next_video`

`open_video` and `open_exercise` can use the contentIds/nodeIds above (Learn URL). They are not chrome clicks. Console action that installs these lesson apps (replacing demo-mode boot) is **not** in this pass. It waits for an explicit Koen OK, then Pixel. No merge of App#10 until Koen names the PR.
