

Grade 5A — Add and subtract fractions

Teacher inspection pack · disk duration-kolibri-grade5a-001 · idea04 :18081

Inspection sheet for Koen and teachers. Titles and IDs are the locked pins already in App#10. This is not a new topic and not new teaching text. Science and every other Khan topic stay out of this set.

Pack

Lesson title	Grade 5A Duration Lesson
Lesson id	b888e92b-cec7-7ba4-c82b-b001e62d3b9a
Class	Grade 5A · 8264b7d5-6c63-1373-ee7d-4886f4c5dac1
Facility	Duration Tests Facility · 386af378-31fa-4737-2e2d-6bac44aa2292
Topic	Add and subtract fractions
Topic path	Math by grade > 5th grade > Add and subtract fractions
Topic nodeId	4a5b44d4-826e-511b-8bb2-e568b9562c5c
Topic contentId	9db892cf-eba7-5254-a450-f553dd8590d5
Channel	Khan Academy (English - US curriculum) · c9d7f950-ab6b-5a11-99e3-d6c10d7f0103 (public, no Studio token)
diskId / instanceId	duration-kolibri-grade5a-001 / kolibri-grade5a-001
Container / data	idea168-kolibri-g5a-khan · /home/pi/idea168-kolibri-g5a-khan
Image	koenswings/kolibri:1.0-0.15.5-dev
Sign-in	teacher / password hint teacher · learners learner01—learner03
Intent pins	open_video video-grade5a-khan-01 · open_exercise exercise-grade5a-khan-01
Source pins	fixtures/kolibri/content/CONTENT.live.json and CONTENT.khan-remap.json

How a teacher opens it

- Base URL (idea04): <http://100.108.39.45:18081/>
- Coach classes (fixture URL): <http://100.108.39.45:18081/coach/#/classes> — class **Grade 5A**, lesson **Grade 5A Duration Lesson**.
- The named lesson assigns **all 3 videos and all 3 exercises** below (same titles and IDs). None of them is topic-only. Order: the three videos, then the three exercises. `open_video` / `open_exercise` still resolve to leaf 01 as the walker entry, not as the only assigned resources.
- Live Kolibri on idea04 was last provisioned 2026-10-01 with only leaf 01 of each kind. `provision-khan-pack-lesson.py` (PACK=g5a) now writes all six onto `Lesson.resources`. Re-run it on a Running sidecar to update that row. This sheet did not start the sidecar.
- Learn content (existing walker URL shape): <http://100.108.39.45:18081/learn/#/topics/c/<nodeId without dashes>>
- Lesson route (existing walker URL shape): <http://100.108.39.45:18081/learn/#/lessons/b888e92b-cec7-7ba4-c82b-b001e62d3b9a>
- Learner home (fixture URL): <http://100.108.39.45:18081/learn/#/topics as learner01>.

Live check 2026-10-04 13:43 CEST (read-only, no claim, no restart). idea04 (100.108.39.45) answered ping. TCP connect to the pack port was refused, so the sidecar is not accepting HTTP right now. Pins below are from the 2026-10-01 import (6/6 leaves available then). This check did not start or stop anything.

Videos (3)

#	Kind	Title	logicalId	contentId	nodeId	
---	------	-------	-----------	-----------	--------	--

						On the named lesson?
1	video	Visually adding fractions: $5/6+1/4$	video-grade5a-khan-01	757e1a6e-9ea1-5168-b99a-0bf7eeb30662	ef357630-56fe-5113-9467-10a750e4e75c	yes — assigned on the named lesson
2	video	Visually subtracting fractions: $3/4-5/8$	video-grade5a-khan-02	fc6dd800-d701-5d42-83a0-1fd9079bf5ce	43d4efc4-89e1-50b1-9a3b-7a7460e30fd9	yes — assigned on the named lesson
3	video	Estimating adding fractions with unlike denominators	video-grade5a-khan-03	6dda429c-3980-5a81-9efb-bdc9322662b0	cbb99d49-1f40-5719-b44f-1e6d12380c3f	yes — assigned on the named lesson

Exercises (3)

#	Kind	Title	logicalId	contentId	nodeId	On the named lesson?
1	exercise	Visually add and subtract fractions	exercise-grade5a-khan-01	2f9204d3-af37-58b9-8fa0-fd86a0c03c5d	0ed1af8f-bbe7-58bb-b743-168938dc8a38	yes — assigned on the named lesson
2	exercise	Estimate to add and subtract fractions with different denominators	exercise-grade5a-khan-02	94ab05b5-f3ff-506a-b18d-e630ac9cb0cb	1d4c27c6-d3bd-59e0-bd87-fdb59eb68a2b	yes — assigned on the named lesson
3	exercise	Common denominators	exercise-grade5a-khan-03	c306ffe2-69f3-52fa-8417-deba6f616504	23e04672-61d6-5705-bd6d-e61adb6dbbec	yes — assigned on the named lesson

What this sheet covers vs lesson chrome

Covers: the content pack a teacher can run once the sidecar is listening — lesson title, the six leaf titles, contentIds, nodeIds, and the existing Learn/Coach URLs.

Does **not** cover lesson-chrome Intents. These stay deferred until a Kolibri image exposes `data-testIdS`. Stock image `koenswings/kolibri:1.0-0.15.5-dev` does not. Preferred future names are in `tests/duration-tests/LESSON_CHROME.md` and are not in this image:

- `keep_watching`
- `next_resource`
- `exit_lesson`
- `finish_exercise`
- `next_video`

`open_video` and `open_exercise` can use the contentIds/nodeIds above (Learn URL). They are not chrome clicks.

Console action that installs these lesson apps (replacing demo-mode boot) is **not** in this pass. It waits for an explicit Koen OK, then Pixel. No merge of App#10 until Koen names the PR.
